Our Beautiful Color Illustrations

On First Page of Cover you will find **FIVE OF THE BEST AND MOST DISTINCT CANNAS** that grow. These five varieties will make a charming combination planted in a group, singly, or in a bed, as stated below and will make a fine showing all summer until frost.

Price of these Grand Cannas, 15 cents each; any two for 25 cents; any five for 50 cents; twelve for \$1.00. In lots of fifty or more, 8 cents each, by express.

1. MME. CROZY

The color is a brilliant vermillion-scarlet, bordered with a deep golden-yellow. The flowers are borne in great clusters, and in such profusion that they crown the plant with a blaze of glowing color. Height three and one-half feet.

2. MME. BERAT.

This is a pink variety of French origin. Entirely distinct from any other sort. It is much the darkest of all the pink Cannas, being dark carmine-pink. Heads of bloom are held very erect and well above foliage. A showy, effective bedder. One of the finest introductions. Height four feet.

For a bed to consist of above Cannas we would plant as follows: For center, DUKE OF MARLBORO; second row, FLORENCE VAUGHAN; third row, J. D. EISELE; fourth row, MME. BERAT; fifth row, MME. CROZY. Cannas should be planted one foot apart.

N. B.—Our Cannas are all started in pots, and will make a showing from the time they are planted.

4. J. D. EISELE

Bright vermillion-scarlet, overlaid with orange; a fine bedder. Height three and a half feet.

5. DUKE OF MARLBORO

Beautiful crimson-maroon; the largest Canna grown. A sturdy, erect grower, with fine metallic-green foliage. Height four feet.

3. THE BEAUTIFUL NEW SPOTTED CANNA, FLORENCE VAUGHAN

Conceded by all who have seen it to be the finest yellow spotted Canna. Flowers very large, of the most perfect form, with broad, overlapping petals, nicely rounded at the ends. Color a brilliant yellow, spotted with bright red. A strong grower and flowers very freely. Height four feet.

Bed of Red Geraniums with border of Dusty Miller

AS SHOWN ON INSIDE OF FOURTH PAGE COVER.

We think a bed of Red Geraniums with a border of Silver-Leaved Centaurea, commonly called Dusty Miller, is very popular. For this bed we highly recommend the Red Geranium Heteranthe, without doubt the very best bedding Geranium in America today.

For a bed five feet across, as shown on page 4 of cover, it will take **Twenty Geraniums** with a border of **Twenty Dusty Miller**. Price, complete, **Forty Plants, \$2.25 by Express; by Mail, \$2.50**. Should you not want the border, the **Twenty Geraniums** will cost **\$1.25**.

Should any of our customers prefer Coleus to the Dusty Miller for a border to this bed, we will send them at same price as Dusty Miller. We would suggest the Yellow Coleus Golden Bedder, as it will make a beautiful contrast to the Red Geranium.

Dusty Miller for border, 5 cents each; 50 cents per dozen; \$3.50 per hundred, by express.

For other Geraniums, please see Pages 21 to 25.

For other Bedding Plants, see Pages 4, 5, 6 and 16.

TRY A BED OF RED SALVIAS

as shown on second page of cover, and you will have something dazzling.

Plant about 10 inches apart.

Price, 6 cents each; 60 cents per dozen; 25 for \$1.00; \$3.00 per 100 by express.

For a striking contrast to the Red Salvias plant for a border

NEPHROLEPIS WHITMANI

The Improved Tarrytown Fern.

In this we have unquestionably the most valuable *Nephrolepis* of the Ostrich Plume type yet introduced; not only is it of dwarfer and more compact habit than the *Nephrolepis Elegantissima*, but the pinnae, being more deeply divided, give the plant a much more graceful appearance, while another important point in its favor is the fact that not a single frond has ever reverted to the common Boston Fern. Price,

young plants, 20 cents each; strong, three-inch plants, 30 cents each; large plants, 50 cents each; extra fine plants, 75 cents each.

IPOMOEA MAXIMA

The new improved White Moonflower. Three times the size of the old White Moonflower. An enormously large variety, completely covering the vine with a veil of white and extremely fragrant flowers. Price, 20 cents each; two for 30 cents.

TWO HARDY RED AND WHITE CARNATION PINKS

New Hardy Red Carnation Pink.

Price, 10 cents each;
three for 25 cents;
seven for 50 cents.

New Hardy Ever-Blooming Red Carnation Pink.

Dwarfer than the average Carnation, growing about a foot in height; is perfectly hardy; color a dark red; very double; blooms continually throughout the summer.

Her Majesty

Double white Pink. Perfectly hardy and very fragrant. For further description see page 71.

THE MARY OZARK ASTER SEED

SOMETHING NEW, RARE AND BEAUTIFUL

WE HAVE come into possession of the finest strain of Asters we ever saw. It should probably be called the Ribbon Aster, because the blooms resemble silk and satin baby ribbon.

We saw the blooms and can recommend them highly. The plants grow to be about fifteen inches tall and are very free bloomers, blooms measuring three to four inches across. We have them in the following varieties. Price, 20 cents per packet; four varieties 60 cents.

Purple Aster Striped with White—Different shades on same plant. Some of the Asters are a beautiful lavender, every one striped with white.

Pink and White—Striped ribbon Aster.

SEASON OF 1908

To Our Customers and Friends:

It has always been our aim to supply the best quality of Plants, Seeds, Bulbs, and Fruits, and to treat you with fairness and liberality.

We want you to have the best possible service, and if at any time you receive plants that are not satisfactory, or if a mistake has been made, please write us in as few words as possible just what is wrong, and we will at all times make it right. Please remember we guarantee our plants to reach their destination in good growing condition, but after that our responsibility ceases.

Always state in your orders if plants are to be sent by mail or express—if by express, by what company.

Thanking you for your patronage in the past, and hoping to receive your future orders, we remain,
Very truly yours,

SCHMIDT & BOTLEY.

VERY IMPORTANT

Before sending your order read the following, as it will start your order all right and will prevent any misunderstanding. We pay postage on all shipments by mail.

First of all, state how we should send your order. If by mail, select according to premiums as per table below for mail orders.

If you want us to send your order by express at our expense, please so state and we will pay charges; but we will remove all the soil from the plants, which is what all other florists do who pay express charges, and in that case it will make the shipment the same as sending it by mail. So we ask you to select premiums under our mail rates.

Last, but not least. The proper way to receive plants is to have them sent by express at your expense, leaving part of the soil on the plants, and you will be able to save nearly every one of them, and it will be the means of your receiving them in better condition, and we can send larger plants; also, you can select more premiums and the charges oftentimes are not more than 35 cents on a \$3.00 order. Figure for yourself how many additional plants you can get for a small outlay for express charges. The amount of charges is given on each shipment and said charges are placed on the shipping tag by our agents in this city, which will insure our customers the benefit of the 20 per cent. discount allowed on plants, doing away with excessive charges often placed on shipments at their destination. So we ask our customers to pay no more than stated on the tag.

N. B.—We do not pay express on fruit or tree orders, nor allow any premiums on such orders, so keep them separate from plant and seed orders. Our nurseries and greenhouses are separate and shipments are never sent together, so if you receive your shipment of plants it is evident we received your order and fruit and tree order will follow soon afterward.

PREMIUMS ON PLANT ORDERS

PURCHASER'S OWN SELECTION.

(Note Difference Between Premiums on Mail and Express Orders.)

INDIVIDUAL ORDERS ARE ALLOWED THE SAME RATES AS CLUB ORDERS

How to Send Club Orders—Keep each person's order separate, giving his or her full name with the amount of the order. Then make your selection of the amount due you, naming plants desired as your discount.

How We Pack Our Club Orders—Each person's plants will be packed separately, with his or her name attached, so you will have nothing to do but deliver the bundle. If the plants are to be sent by mail, and you desire them to be sent direct to the person, we will do so when their order amounts to \$1.00 or more.

If Plants are to be sent by Express, always mention by which Express Company you wish them sent.

OUR FALL CATALOGUE—On the first of September we issue a Catalogue of Bulbs and Plants for fall planting and winter blooming, such as Hyacinths, Tulips, Narcissus, Crocus, Ixias, Freesias, etc. We mail this Catalogue to all of our customers of this and last year, and we also send it free to others who wish to order.

BE SURE TO SIGN NAME AND GIVE ADDRESS—Many orders reach us lacking either or both. Customers when writing about unsigned orders will aid us in identification by mentioning some of the articles ordered. We have a number of unidentified orders on hand now.

PROMPTNESS—We fully realize the importance of promptness, and nothing would please us better than to ship all orders the same day we receive them. We always make a special effort to do this as long as we can, but in April and May, during the extreme rush, it is impossible for us to do so. We would suggest that from the tenth of April to the last of May you send in your orders a few days before you want your plants. By doing this you will avoid any possible delay during our busiest months, and remember that it takes orders from two to five days to reach us, and the same length of time for shipment to reach you. Use our order sheet, and help us all you can in this way.

A Bed of "Hardy Eight" Roses

SCARLET BEDDER—This is, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. Flowers are large size, fiery scarlet, a color rarely seen in Roses. Planted everywhere on account of its color and freedom of bloom.

MME. ABEL CHATENAY—A free bloomer, with flowers of good size; rosy-carmine with darker shadings. Full double and of splendid substance.

HELEN GOULD—(The Balduin.) This is a most notable production—the strongest growing, freest blooming and hardiest Hybrid Tea Rose now known. One of the largest and fullest of red Roses. Long, plump buds, forming flowers of grand size and great beauty. A most valuable cut-flower variety, rivaling American Beauty. Rapid, abundant grower, producing great quantities of large, fine flowers.

We have been offering our popular "Hardy Eight" Ever-blooming Set of Roses for the past ten years. Every year the demand for them increases. This speaks for itself. They are better than ever this spring.

ETOILE DE LYON—This magnificent Tea Rose is a rich golden-yellow; a strong, healthy and vigorous grower, immense bloomer, bearing flowers and buds early and late. Surely one of the very best and most beautiful yellow Tea Roses for general planting ever introduced. Remarkably hardy.

New Pure White Royal Tea Rose, KAISERIN AUGUSTA VICTORIA
The Best White Rose in the World

This beautiful Rose has not only a royal name, but is a royal Rose as well. It is a continuous bloomer, producing successive crops of buds, and formed with large petals of best substance; shows no center when fully open; color pure creamy-white. It far surpasses any other white Rose in all particulars, and has a much richer perfume.

DUCHESSE DE BRABANT—This Rose combines exquisite perfume, beautiful coloring and a matchless profusion of flowers and foliage. How shall we describe its coloring? Soft, light rose, with heavy shading. Quite hardy, and in every respect it is admirable.

of amber and salmon.

HERMOSA, the Old Favorite—It is hardy as an oak, and always covered with its clear, pink blooms; there is not a shade or color of any kind to mar its purity. We doubt if any Rose ever grown will take its place. No Rose will give more general satisfaction. 15 cents each.

PAPA GONTIER—A grand, red Tea, of fine crimson shade and silken texture (as distinct from velvety texture). The bud is of fine size and graceful form. Extremely free both in growth and bloom. Very long and beautifully-leaved stems can be cut, the foliage being very dark and heavy. One of the best, and a perfect bedder. If you desire a good Rose, one that will give you entire satisfaction, you should procure one of these.

HARDY EVER-BLOOMING La FRANCE ROSES

The full set of lovely La France Roses for only 40 cents. The set in large, two-year-old plants for \$1.25.

These are perfectly hardy Roses, blooming constantly, and have the most admirers of any Roses we grow. There are no better Roses than the La France Roses. A distinctive characteristic of the set is the true La France fragrance, by which every one may be known.

PINK LA FRANCE

It is of superb form, and double as a Rose can be. No variety can surpass it in delicate coloring—silvery-rose shades with pink. It has a satin sheen over all its petals. It is most universally regarded as the most useful of Roses, for it is hardy beyond question. It blooms continuously. The flower is large, finely built, endures for a great length of time, is exquisitely colored and fragrant in the highest degree. Price, 10 cents each; large size, 30 cents each.

STRIPED LA FRANCE

(Madame Angeliue Veyssset.) The striped La France combines all the good qualities of a La France in growth, fragrance, shape of bud and flower—in fact, differs not from it except in color. It is nicely striped, the markings being plain and distinct, the variegation being a beautiful bright rose on a satin-pink ground. Price, 10 cents each; large, two-year-old size, 30 cents each.

THE RED LA FRANCE

(Duchess of Albany.) We have no hesitancy in saying to our customers that this Rose stands at the head of all Roses, not excepting La France. What we wish to impress is the fact that as a Rose for all purposes it has no peer. It is identical with La France, excepting in three points. Those are a more vigorous growth, a large and more expanded flower, and a deep, even pink in color—not shaded, but what is called a solid color. Price, 15 cents each; large two-year-old size, 35 cents each.

WHITE LA FRANCE

(Augustine Guinnoiseau.) Here we have a beauty indeed, one we can recommend to all, whether for outdoor culture or for pots in the house for winter. It is identical with La France, except in color. It is pearly-white, sometimes tinted with fawn. Price, 10 cents each; large, two-year-old size, 35 cents each.

HARDY ROSES—HYBRID PERPETUALS

A SPLENDID LIST, COMPLETE IN EVERY PARTICULAR. NONE BETTER; NONE SO CHEAP.

Hybrid Perpetuals are considered the most valuable of all hardy plants. They are distinguished by their vigorous, upright growth and large, bold flowers, frequently measuring five to six inches in diameter. When you plant Hybrid Perpetuals you may be quite certain of having Roses every year without further trouble. Though called perpetual, it must be understood that they are not such early and constant bloomers as the ever-blooming Roses. The Hybrid Perpetual should not be ordered for house culture, as they are not suitable for that purpose. Do not become impatient if your plantings of these do not bloom the first season—give them a chance to become established. These Roses are especially suited to plant in all the Northern States and Territories, also in the colder parts of the States of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

N. B.—Should our customers not desire the varieties we recommend, or the borders, we would be pleased to have them make their own selection at prices stated on following pages.

Many people prefer Canna beds entirely of one kind or color; therefore we offer the following suggestions for planting in such manner: Cannas should be planted in good rich garden soil mixed with half of old, rotten stable manure. Water sparingly for the first two weeks after planting; when growing freely, water liberally. Set the plants twelve inches apart each way, and if more than one kind is used be careful to plant the taller growing kinds in the center and the dwarf ones along the edge. This applies to planting in beds.

Customers can select any variety that we list. It is well to select kinds that will grow the required height you would like to have the plants attain. Note height of each kind is plainly stated in description.

For a Solid Red Bed of Cannas

For a solid red bed of Cannas we would recommend either of the following: *Pennsylvania*, *Flamingo*, *J. D. Eisele*, *Duke of Marlborough*, *Charles Henderson* or *Alphonse Bouvier*. Price, two for 25 cents, five for 50 cents, twelve for \$1.00; in lots of fifty, 8 cents each.

For a border to this red bed we would suggest *Yellow Coleus* or *Dusty Miller*. Price, six for 25 cents, twenty-five for \$1.00, or \$3.00 per hundred, by express.

For a Solid Pink Bed of Cannas

For a solid pink bed of Cannas we would recommend *Madame Berat*, which is the best pink, with *Dusty Miller* or *Salvias* or *Coleus* for border. Price, two for 25 cents, five for 50 cents, twelve for \$1.00; in lots of fifty, 8 cents each. *Dusty Miller*, *Salvias* or *Coleus*, six for 25 cents, twenty-five for \$1.00, \$3.00 per hundred, by express.

7-Foot Canna Bed

For a seven-foot bed of Cannas, similar to the photograph shown above, we recommend the following: **Six Duke of Marlborough** for center, color crimson-maroon, height from four to five feet; for second row, **twelve Florence Vaughan**, best yellow spotted, height four feet, and **eighteen Madame Crozy** for outside row, color brilliant vermilion-scarlet, height about four feet; for a border, **thirty red Salvias**.

IN LOTS OF 50 OR MORE, 8 CENTS EACH.

For the nicest effect and best results, Cannas should be planted about twelve inches apart, and Coleus about nine inches apart, so measure your beds, and you can soon tell just how many you want. Our Cannas are all started and growing in pots, and not dormant roots.

Alemannia

The flowers are truly gigantic in size, the upper petals spreading fully seven inches, and the form is really semi-double. It produces the largest flowers that have been obtained as yet in the way of a Canna. The outer petals are orange-scarlet, with a very broad golden-yellow border. The plant grows about five feet high, with numerous musa-like glaucous leaves. We consider this variety one of the best of the Orchid type.

Alphonse Bouvier

Finest tall; brilliant crimson; foliage green; six to seven feet.

America

The first red-leaved Canna in the giant-flowered class. Height four to five feet; foliage fine glossy bronze, almost as if varnished; flowers extra large, deep orange, flamed and striped with deeper shade; entirely distinct from any other Canna, both in foliage and flower.

Creamy-White Canna

Alsace

Has creamy-white flowers and blooms throughout the season in fine shapely plants, three to four feet high. Until the introduction of our new white Canna Mt. Blanc, Alsace was the nearest approach to a pure white variety. But it is still in great demand because of its low price and the magnificent and striking effect it produces when planted with other Cannas, especially in large rows and beds.

The Handsome Lily-Flowered Canna

Austria

A companion to Canna Italia; the same wonderful qualities of growth and flowers, with the exception that its wonderful large blooms are of a beautiful canary-yellow; height five feet.

Burbank

Color rich canary-yellow, with a few carmine spots in throat; giant orchid-like flowers, the upper petals measuring fully seven inches across; it is a vigorous-growing plant, attaining a height of about five feet, with shiny leaves of a leathery texture.

"Black Beauty" (1905)

Black Beauty is well known for the magnificent color of its deep, rich purple leaves; its flowers are insignificant. This improved variety retains the same beautiful foliage, but grows more luxuriantly and also bears bright red flowers. Attracted more attention at the World's Fair in 1904 than almost any other Canna there. Height, three and a half feet.

Charles Henderson

The standard of excellence of all crimson Cannas; bright crimson, with pencilings of golden-yellow at center. About four feet in height.

David Harum

Foliage dark, glossy bronze and plum; flowers borne freely in loose trusses; in color, orange-scarlet, spotted vermillion, with conspicuously protruding pistils of amber. Height three to three and a half feet.

Egandale

Probably the finest bedder of its color, if not of the whole list. Deep, soft red, compact spikes of medium size; a wonderful, profuse bloomer, beds of it being literally a mass of red; foliage a beautiful, rich purple. Height four feet.

Eldorado

The flowers are of the largest size, head full, and borne well erect above the foliage, while the habit is more dwarf and compact than Madame Crozy. The color is a rich, pure golden-yellow, speckled with a red so light that the general effect, even at a very short distance, is that of a pure golden-yellow. In this we have an ideal yellow Canna, the flowers of full size, and dropping from the spike as soon as faded, leaving the bed always a mass of brilliant color. Height three and one-half feet.

Duke of Marlboro

Beautiful crimson-maroon; the largest Canna grown. A sturdy, erect grower, with fine metallic-green foliage. Height four feet.

Duke of Marlboro

Flamingo

The color is a solid crimson, without spot or blemish; whether grown indoors or out, it is constantly surmounted by a crowning glory of perfect blooms, whose sparkling brilliancy is as bright as the plumage of the Flamingo bird. Foliage a luxuriant, deep green and tropical-like. Height four feet.

EVER-BLOOMING CANNAS--Continued

Price, 15 Cents Each; Two for 25 Cents; Five for 50 Cents; Twelve for \$1.00. In Lots of 50 or More 8 Cents Each.

The Beautiful New Spotted Canna, Florence Vaughn

Conceded by all who have seen it to be the finest yellow spotted Canna. Flowers very large, of the most perfect form, with broad, overlapping petals, nicely rounded at the ends. Color a brilliant yellow, spotted with bright red. A strong grower and flowers very freely. Height four feet.

The Lovely Orchid-Flowering Canna, Italia

One of the wonders of recent introduction, with large, musa-like foliage. The flower spikes produce a number of extraordinarily large flowers of a beautiful scarlet color, edged with yellow, a plant that should be in every collection. Height five feet.

J. D. Eisele

Bright vermilion-scarlet, overlaid with orange; a fine bedder. Height three and a half feet.

Mlle. Berat

This is a pink variety of French origin. Entirely distinct from any other sort. It is much the darkest of all the pink Cannas, being dark carmine-pink. Heads of bloom are held very erect and well above the foliage. A showy, effective bedder. One of the finest introductions. Height four feet.

Mme. Crozy

The color is a brilliant vermilion-scarlet, bordered with deep golden-yellow. The flowers are borne in great clusters, and in such profusion that they crown the plant with a blaze of glowing color. Height three and one-half feet.

Miss Berthine

Brunner

Large, open panicles of pure yellow flowers, minutely spotted with orange-scarlet. Height four feet.

The Mammoth-Flowering New Canna,

Mrs. Kate Gray

One of the largest-flowered Cannas ever introduced. Flowers round and full, of a clear wine color, beautifully suffused with gold. Notwithstanding their size, the flowers have a great deal of substance and are very showy and effective. Besides its fine flowering quality, its broad green foliage gives Mrs. Kate Gray another point of merit which makes it one of the best all-round Cannas to date. Height five feet.

Partenope

Flowers of extra large size, the broad, wavy petals glisten like silk; the prevailing color is orange, delicately streaked with scarlet tints, and suffused with salmon; early and a free bloomer, green foliage; five to six feet in height.

The New Salmon-Colored Canna, Paul Marquant

The individual flowers are large, and the flower spike very large, each flower standing out separately by itself. The color is very hard to describe. It might be described as a bright salmon with a carmine tint. Height four and a half feet.

Tarrytown

The Finest of All Cannas. No Variety Approaches It for Display; Three Feet.

The flowers are large, but its particular value lies in the earliness with which it blooms, the abundance of flowers produced, its branching habit and the length of time the flowers remain after they open. Another point of superiority is the fact that the flowers are thrown well above the foliage and the heads of bloom are held very evenly, and so freely produced that the foliage is almost hidden.

One characteristic of this variety which largely gives it its value is its wonderfully branching habit, two or three spikes of flowers being in bloom on the same stem at the same time, producing a mass of bloom.

Pennsylvania

We ask particular attention to this grand new American Hybrid Orchid-flowering Canna, because in addition to being one of the largest and most magnificent varieties ever introduced, it is the only pure deep red flowering sort in the Orchid-flowering class. The flowers are immense, often seven inches across, with petals two and a half inches broad, borne in splendid branching spikes. A tremendous bloomer; begins quickly, keeps it up. This Canna was the most magnificent of all those grown on our grounds here last summer. Its grand size, pure, deep scarlet color and profuse blooming habit place it at the head of Orchid-flowering Cannas to date. Height six feet.

The Brilliant New Crimson Canna,

President McKinley

Pronounced by all the best dwarf crimson bedder introduced. Color a very deep crimson-scarlet, the nearest approach to the color of the Alphonse Bouvier of any Canna we have. It is an early, constant and immensely profuse bloomer. Height two and a half feet.

Sam Trelease

Velvety-scarlet, intensified by a thin broken edge of polished brass, center petal and throat of mottled orange. Height three feet.

The Giant Bronze Canna, Robusta

This is the largest of all the dark or bronze-leaved Cannas, grows six feet high, with tremendous length and breadth of leaf. It seldom blooms, but for hiding unsightly walls, fences, etc., or for a massive background, it is "just the thing."

OUR BEAUTIFUL NEW BEDDING COLEUS

Coleus represent more colors in their variegation than any other plant. They are certainly the most popular of colored ribbon plants. Whether grown as single specimens or in masses of ribbon lines, they are equally attractive. They are of the easiest culture and well adapted to our climate, flourishing in the hottest sun as well as displaying their beautiful colors in the shady corner where hardly any other plant would do. Plants should be set about a foot apart, so that when the size of the bed is ascertained it is easy to figure how many plants of each kind are needed in a row. All are good bedders and will stand the hot sun without losing their brilliant coloring.

Autumn Leaves—All colors of autumn combined. A most beautiful variety.

Golden Bedder—Clear yellow when well developed, edge somewhat crinkled, with center rib of lighter yellow.

Purple Prince—Dark maroon, with a purple cast, delicately veined with bright red.

Admiration—Foliage large and finely serrated; color rich purple and carmine. Very distinct.

Count Cuvier—Center fiery-red, surrounded with deep maroon, edged olive-green, serrated edge.

Fire Crest—The major portion of the foliage is a bright carmine-crimson shade, the edge is slightly marked with golden-yellow, which heightens the coloring; the center of the leaves is blotched with deep bronze.

Red Cloud—Bright red; one of the best.

Rainbow—Center clear carmine with broad chocolate border edged green.

Beckwith's Gem—A beautiful fancy variety, with large leaves, of heavy texture and finely scalloped edges. The center of leaf is dark, velvety-maroon, bordered with fiery-red; the edge is green, changing to creamy-yellow at the point of the leaf.

Hero—A deep jet black.

Miss Retta Kirkpatrick—Large white center, shaded with yellow, broad green-lobed margin; large foliage.

Mrs. Hunt—A beautiful carmine center, bordered maroon, with bright green margin.

Setting Sun—Crimson, with brightest golden edge.

Verschafeltii—A rich velvety-crimson. The best bedder.

Tam O'Shanter—Large, deep green foliage, with creamy-white center, heavily splashed carmine and chocolate. A splendid variety for pot culture.

Spotted Gem—Yellow, blotched crimson and green.

Rob Roy—Dark carmine-pink; yellow and green edge, finely serrated.

Queen of the West—Large leaf and slightly serrated; outer band of bright oxide-green with margin of bright yellow and center wedge of creamy-white; the whole covered with blotches and spots of bright carmine and deep maroon.

GALLIEE—Rich, deep, pink, large flowers of good substance, and not only flowers in summer, but will make a beautiful plant for the window in winter.

"JOAN OF ARC," New Double White Ivy Geranium—This is one of the most beautiful plants that it has been our privilege to offer. The flowers are perfectly double, white as snow, and literally cover the plant when in full bloom. The foliage is extremely handsome, the dense, glossy green leaves making a most effective background for the great cluster of snow-white flowers.

MRS. J. G. DAY, The Beautiful New Ivy Geranium—The color is an intense glowing shade of rosy-crimson, of free-flowering habit, robust and sturdy, foliage thick and glossy. The size of flower and length of stem and free growth all make this variety remarkable, while its color is as high as any red Zonal.

SWEET-SCENTED GERANIUMS

Price, 10 cts. each; any 3 for 25 cts.

Apple-Scented—Apple fragrance.

Balm-Scented—Delicious balm fragrance.

Lemon-Scented—Delightful lemon odor.

Peppermint—New and delightfully scented peppermint; strong grower.

Oak-Leaved—Beautiful foliage, black center, green border, **Rose-Scented**—Two kinds, BROAD LEAF and CUT LEAF. This is the most popular of all scented Geraniums.

Pepper—Strong pepper odor (minus the sneeze).

PELARGONIUM, or LADY WASHINGTON GERANIUM—We take pleasure in being able to offer plants of this very useful Pelargonium. There is nothing that gives better returns for a little care when grown in the window garden than this plant—it will be literally covered with flowers. The flowers are bright cherry-red, with white at the base of each petal; the two upper petals are dark crimson-maroon. The flowers are of immense size and very freely produced. It is this combination of coloring with blotches which obtained for it the title of "Pansy Geranium." Price, 25 cents each; five for \$1.00, all different.

CARNATIONS

THE DIVINE FLOWER

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground quickly make large specimens, and when brought indoors in the fall, produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive. Don't buy them—grow them yourself. Pinch the plants back frequently during the growing season.

AMERICA

(New.) A soft shade of scarlet. Habit, medium height, with a compact growth. A fine sized flower, well formed, nicely filled and not crowded with petals. Good calyx, and long, stiff stems. It is one of the early bloomers. Very free and easy of culture.

BOSTON MARKET

In many sections this is being grown to the exclusion of all other white varieties. Can be depended upon for good sized, nicely shaped bloom in profusion. Stem, form and habit of growth, excellent. Color ivory-white.

FLORA HILL

"The Queen of Whites." It is the grandest white and the most prolific bloomer of the Carnation family that has been raised up to this time. The flower is of enormous size, full and double; has a good calyx; not subject to rust; under the most ordinary culture, produces good flowers throughout the entire season.

HARLOWARDEN

Very strong, free grower; extra long stems; large flower, of bright crimson with shadings of scarlet. Very free.

HARRY FENN

(New.) Magnificent crimson, full and brilliant, very large and full, on a long, wiry stem; habit quite erect; very fragrant.

MISS MAUD MUELLER

Scarlet and white variegated. Will be one of the best Carnations for amateur culture, as it is easily grown, and not at all susceptible to the different Carnation diseases.

MORNING GLORY

Color a very delicate pink, which is its strongest point. A fine grower, producing a long stem and good foliage. A good commercial variety.

MRS. FRANCIS JOOST

This has proved to be one of the most satisfactory and profitable Carnations introduced in years. Color a soft shade of pink. It is a strong, vigorous grower, and is generally recognized to be one of the most profitable Carnations. A No. 1 in every respect, and a variety that we can recommend in the highest terms.

New Fancy Carnation, PROSPERITY

This is the largest Carnation ever offered. It is a wonderfully free bloomer, considering the monster size that the flowers attain. White, overlaid with pink, in mottles reminding one of the beautiful tints seen in Azaleas.

SUNBEAM

The first yellow that can be pitted against Buttercup in point of color, and in all other points of that celebrated variety. Strong grower and free flowering, long, strong stem. Flowers three inches in diameter and a deep golden-yellow with faint red stripes.

We offer on this page eight of the best new Carnations. Price 10 cents each; three for 25 cents; any seven for 50 cents; any fifteen for \$1.00.

Harlowarden and Mrs. Francis Joost.

CARNATION NOVELTIES FOR 1908

PRICE, 15 CENTS EACH; COLLECTION
OF FOUR FOR 50 CENTS.

WHITE ENCHANTRESS

This is a pure white sport of Enchantress, which is at once the most popular and most profitable Carnation grown today; and this on account of its size and stem and freedom with which it blooms. White Enchantress is identical in every respect but color. Those who desire quality as well as quantity will find it in White Enchantress.

WINSOR

This is sure to prove a winner. Nothing approaches it in color, which is a clear silvery-pink—a shade between Enchantress and Mrs. Thos. W. Lawson—and much more beautiful than either. In fact, it is just the shade that we have all been trying to get. The color will make it sell in any market. The stem is just right. The flowers are considerably larger than the Lawson and much better shaped. As a grower it has everything that can be desired. So far we have not seen any large flowering variety quite so free as Winsor.

ROSE-PINK ENCHANTRESS

A lovely rose-pink shade of color put on by the old favorite "Enchantress." The parent's practical, wide-awake habit of growth and trustworthy blooming qualities have always made it popular, and this new coloring but adds greatly to an already first-class reputation.

PRESIDENT ROOSEVELT

Flowers large, very full, deeply fringed; deep brilliant scarlet-maroon, full, rich and striking; a great producer, flowers averaging three inches in diameter.

White Enchantress

Bed of Tuberous-Rooted Begonias

Gorgeous Bedding Tuberous-Rooted Begonias

Have you tried our Superb Bedding Begonias? If you have not, you should certainly plant at least a few this spring.

THEY ARE GRAND.

The tuberous-rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors. The very handsomest of our summer-blooming plants, flowering throughout the season, and as fine and varied in their color as the Geranium family. They grow in cow manure and sharp sand. See that the bed is in partial shade and you will be delighted with the result. In the South, or where they cannot be planted in the shade of a house, a covering of burlap or canvas, some six or eight feet above them, merely to throw off the sun's rays, will allow them to come to absolute perfection, but they must have plenty of light and air. Do not allow them to become dry, and during hot weather they will take two waterings a day. When through flowering they can be dried off, shaken free of earth and wrapped in cotton until February or March, when they may be started again. Single separate colors, white, scarlet, pink and yellow, 10 cents each; three for 25 cents; fifteen for \$1.00.

Double, separate colors, white, scarlet, pink and yellow, 15 cents each; four for 50 cents.

Beautiful Ferns for Specimens and Ferneries

These beautiful plants are now generally cultivated. Their great diversity and gracefulness of foliage make them much valued as plants for vases, baskets or rock work, or as specimen plants for parlor or conservatory. Keep them out of the direct sunlight and water carefully, that the delicate roots lying near the surface may never become dry.

ELEGANTISSIMA OR TARRYTOWN

A sport of the popular *Nephrolepis Pierstoni* Fern. Much more beautiful and an improvement over the *Pierstoni*. Is more dwarf and compact, the fronds broader and only half the length. The small side pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description—must be seen to be appreciated. **Price, nice plants, 2-inch pots, 15 cents each; strong, 3-inch, 25 cents each; extra large specimen plants, 50 cents each.**

WHITMANII

The newest and finest Fern yet introduced. This Fern made its first appearance last fall, not having been offered until then by any firm. It is the best Fern of the Boston type yet introduced. It is somewhat similar to the Fern *Tarrytown*, but much more compact and shorter in its growth. **Price, fine young plants, 20 cents each; strong, 3-inch plants, 30 cents each; large plants, 50 cents each; extra fine plants, 75 cents each.**

NEW NEPHROLEPIS SCOTTI

Of much dwafier and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and coarse as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. **Price, strong plants, 15 cents each; large plants, 40 cents each.**

The New Fern *Nephrolepis Pierstoni Elegantisima*.

OTAHEITE ORANGE

A grand pot plant, and one of great beauty and novelty. It blooms most freely during the winter, though it is likely to bloom at any and all times of the year. The fruit is about one-half the size of ordinary oranges, and very sweet and delicious. **Price, 10 cents each; large, strong plants, 25 cents each.**

The Border Plant, PENNISSETUM

Ruppelianum — (Purple Fountain Grass.) A beautiful annual ornamental grass, growing about two and one-half feet high, producing long, graceful, cylindrical, purplish plumes. An excellent ornamental plant for all bedding purposes, and the most appropriate we know of to use as an edging to a bed of Cannas. **Price, 10 cents each; three for 25 cents; \$5.00 per hundred; twenty-five at hundred rates.**

FERNS FOR FERNERIES

THE BEAUTIFUL MOSS FERN

Selaginella Emilliana. A new upright growing Moss with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain a height of twelve to fifteen inches. We know of no Moss superior to it. **Price, 10 cents each.**

CYRTOMIUM FALCATUM

Holly Fern. We consider this one of the finest Ferns in cultivation. It is very graceful. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality. **Price, 15 cents each; two for 25 cents.**

ADIANTUM CUNEATUM

Maiden Hair Fern. A very beautiful and graceful Fern, its delicate fronds being much used for cut-flower work. **Price, 10 cents each.**

PTERIS CRETICA ALBA LINEATA

A very handsome Fern, nicely variegated; grows very rapidly into handsome plants. **Price, 15 cents each.**

PTERIS TREMULA

Shaking Fern. One of the finest Ferns for house decoration, growing very rapidly and throwing up large, handsome fronds. It makes magnificent specimens. Easily grown and popular. **Price, 15 cents each.**

PTERIS WIMSETI

A very pretty and useful Fern for specimen or dish. Green leaves with the ends very peculiarly crested. **Price, 15 cents each.**

PTERIS SERRULATA

A useful basket variety of graceful habit. **Price, 10 cents each.**

PTERIS ARGYREA

The New Ostrich Plume Fern

Ostrich Plume Fern.

Nephrolepis Piersoni

An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful beyond description—feathery, plummy, nothing describes them better than "Ostrich Plumes," which they very much resemble. The habit of the plant is grace personified. The fronds arch over in wavy irregularity, delightful to the eye. **Price, strong young plants, 10 cents each; large, handsome plants from four-inch pots, 35 cents each; extra fine plants, 50 cents each.**

The Lovely Boston Fern

THE BOSTON DROOPING FERN

Nephrolepis Bostoniensis. Of which much has been heard during the past year; of the same form as the Sword Fern, *Nephrolepis Exaltata*, but has larger and broader fronds; a more drooping habit. In well grown specimens the fronds attain a height of six to seven feet. Fine for hanging pots and baskets. **Price, 10 cents each; large plants, 20 cents each; extra fine plants, 35 cents each.**

CAREX JAPONICA VARIEGATA

A new ornamental Japanese grass, which is extremely useful as a house plant. The blades with a green center and white edge make it a very effective plant for vases and hanging baskets. **Price, 15 cents each; two for 25 cents.**

CHOICEST CHRYSANTHEMUMS

ONLY EIGHT CENTS EACH; EIGHT FOR 50 CENTS; EIGHTEEN FOR \$1.00

OUR GREAT CHALLENGE COLLECTION OF CHRYSANTHEMUMS.

OUR SPLENDID LIST OF CHRYSANTHEMUMS is unsurpassed anywhere. We take great pride in keeping it up to the highest standard and excellence. A glance over our splendid list will convince anyone that this is no idle assertion. We have by far the most complete collection of this most popular flower in the great Northwest, and there is absolutely not one poor grower or inferior sort among them.

CULTURAL DIRECTIONS FOR CHRYSANTHEMUMS

WHICH, IF FOLLOWED, WILL INSURE SUCCESS

When to Plant—The Chrysanthemum is easy to please on this point. Any time after the ground can be worked, even up to June 20th, will give you good blooming plants in the fall.

Soil—Dig the ground deep; put in quantities of manure. The Chrysanthemum is a gross feeder; if fed well the flowers will be large and the plant strong.

Disbudding and Stopping—When your plant is eight inches high cut back to a height of six inches. Allow your shoots to grow from this main trunk. When these four shoots are four inches high, pinch out the terminal bud, and save three or four branches that will spring from each of these limbs. Allow these last branches to attain a height of nine inches, then pinch back for the last time. **Allow one bud (flower) to each stem, and that a terminal bud.**

WE HAVE THE FINEST AND MOST COMPLETE ASSORTMENT OF "MUMS" IN OUR CITY—CHEAPEST, TOO

ADELE—A new globular, incurved variety; a delicate pink and very early flowering, making it a good commercial sort; an easy grower, with a fine stem and foliage.

BENJ. J. GIROUD—Is the richest deep crimson variety we have ever seen, and excels in its color as Golden Wedding does in yellow. The color is of the richest velvety crimson, which in the flower itself is soft and velvety-like. It is, without doubt, the best Chrysanthemum of its color. The flowers are enormous in size, while the color is the richest of all. Winner of nine premiums and certificates; blooms in October.

BLACK HAWK—Dark velvety crimson; extremely fine grown; in sprays; beautifully reflexed; shows no reverse. (President Roosevelt's favorite variety.)

CAPTAIN GRIDLEY—A high built Japanese incurving of large size; white, shaded bluish.

CARRIE—Deep yellow, dandelion shade; blooms in September; a splendid variety for pots or outdoor planting.

COL. D. APPLETON, The New Yellow—After thorough tests this new Chrysanthemum has proved to be one of the finest yellows ever sent out. It is an ideal exhibition variety, with flowers of immense size, measuring 22 inches in circumference and of great depth. Flower is a magnificent Japanese incurved, with lower petals reflexed, and not showing any center. Besides its immense size and beautiful shade of clear yellow, another point in its favor is its almost faultless stem and foliage, growing fully up to the flower.

ESTELLE—Produces extra-sized flowers of the purest white; fine deep form; under the same conditions of culture it came a week earlier than its parent, Glory of the Pacific, with a far superior flower in shape and substance.

FISHER'S TORCH—Bright, fiery red, the richest shade in Chrysanthemums; large, fine flower.

F. S. VALLIS—(Exhibition.) An immense Japanese flower; yellow, deepening to a fine citron shade; long petals, twisting and reflexing into a broad, deep bloom as large as Madam Carnot, and far superior to that variety, and easy to grow; extra fine.

IVORY—Unexcelled for pot culture or cutting; pure white

When to Lift—In localities subject to heavy frosts in October and November plants should be lifted into large pots or boxes by September 1st. After lifting drench thoroughly, and never allow them to suffer for water. Give manure water, if possible, once a week. If protected from frost by sheeting they need not be brought into the house till well into October, and when brought in place in a room without fire give plenty of air when not frosty. **In cold climate winter in cellar.**

Black Aphides—Nothing destroys this troublesome insect so easily as clean cold water dashed on forcibly with a syringe.

Each year the taste for Chrysanthemums becomes more exacting, and to meet it we offer only the finest exhibition and cut-flower varieties—sorts that are noted the country over.

Adele

flower of exquisite form and finish; has been shown in grand shape at all recent exhibitions; it is especially noticeable for its grand globular form, its Dahlia-like petals and absolute purity of color.

JOHN K. SHAW—Very solid Japanese incurved; large in size, fine light pink, splendid stem and foliage; grows to a height of three and one-half feet, and blooms about October 15. An exceptionally fine variety for commercial use, also as a pot plant.

LAVERNE QUEEN—A new and distinct coloring in Chrysanthemums; a soft lavender-pink; flower is large, with outer petals reflexed and center erect.

CHOICEST CHRYSANTHEMUMS—Continued

LOUIS BOEHMER—(Pink Ostrich Plume.) Louis Boehmer has the same wonderful hair-like growth or excrecence that appeared for the first time in the white variety Mrs. Alpheus Hardy, but it differs from it in color, having a most beautiful shade of lavender-pink, shaded with silvery-pink on the ends of the petals.

MAJOR BONAFFON—Soft, clear yellow, full to the center, eight inches in diameter and nearly as deep. In perfect form and finish; habit dwarf, keeping qualities excellent. It is entirely distinct in color and form from Eugene Dailedouze. It was awarded a World's Fair medal with the highest recommendations from the judges; has won ten first prizes.

MARIE LIGER—This is the new French variety that won the prize offered by the Chrysanthemum Society of America for the finest seedling at the recent Paris Exposition. Closely incurving blooms of large size; the color is pearl-pink, deepening to a very bright shade at the base of the petals.

MARION HENDERSON—The rich buttery-yellow color of the flowers is superb. It is full of petals, and lasts a long time—in fact, although very early it can yet be made late, because it remains perfect on the plant for a long time.

MILLICENT RICHARDSON—Rosy-violet; very large and massive.

MINERVA—An exceedingly attractive, bold, massive flower, very large, incurved, the outer petals drooping, forming almost a perfect flower of the most vivid clear yellow, with extra good stem and fine, handsome, foliage within four inches of the flower. Certificates of merit at New York and Philadelphia.

MLLE. AVIZARD—An exhibition variety, informal and irregular, broad and flat, with incurving petals; color nankeen-flesh, a peculiar and beautiful variety.

MME. JEAN SEINCE—(Exhibition.) From the second crown this brings blooms of creamy-white, tinted rose; long petals cut at the tips and reflexing.

MRS. O. P. BASSETT—The finest of its color ever offered. It is a sport from the grand variety Mrs. Henry Robinson, and takes after its parent in all the fine qualities. The color is a fine canary-yellow; it is a large, flat, incurved variety with broad petals, outer petals drooping a little as the flower opens.

MRS. JEROME JONES—Large creamy-white incurved Japanese, sometimes showing a tinge of pink; high, round flower; one of the best Chrysanthemum flowers up to date; indispensable for exhibition; grand stem and foliage.

● **MRS. CHAMBERLAIN**—One of the most beautiful pink varieties yet produced; a prime favorite wherever known.

MRS. MARTIN A. EYERSON—A pure white; petals narrow; the center builds up with interlacing incurved petals, making a very high flower; distinct in form.

MRS. PERRIN—Color rose-pink within, glistening pink without; recognized wherever shown as the ideal variety in this color; received first prize wherever shown as the best pink; at Boston, Philadelphia and Chicago received most flattering notices.

OPAH—A large, perfect flower that attracts attention wherever shown. White, slightly suffused with pink; blooms early, and may be counted on to give nice displays as a pot plant or clump in the ground; a strong, vigorous grower.

PITCHER AND MANDA—This is the most wonderful Chrysanthemum ever introduced. The outer five or six rows of petals are pure white, of Dahlia-like form; center is a bright, deep yellow, the two colors being sharply defined; most distinct novelty.

THE QUEEN—It excels all in purity, extra large in size, of beautiful half-globular form, with broad incurved, shapely petals of great substance; growth robust, with large, smooth, heavy deep green foliage; carries flowers erect on stiff stems; a grand show flower, and promises to be a very profitable sort for commercial purposes. Price, 10 cents each.

TIMOTHY EATON, The Giant White—It is an enormous globular, Japanese incurved variety of perfect form and growth; color a pure white, even whiter than its parent, Minnie Wanemaker. Timothy Eaton has captured every cup and prize for which it has been entered.

W. H. CHADWICK—Magnificent variety in both form and color, and unsurpassed in size; the center of the flower incurves and the outer petals reflex, making a flower of great depth. Color bluish-white, with a delicate pink stripe in center of petal.

SUPERBA—The most profitable late pink Chrysanthemum now in commerce. A fine Japanese incurved, very double, with a high rounded center; color a bright pink. Price, 10 cents each.

WHITE BOEHMER—A novelty that has even surpassed its promise; immense, perfectly incurved flower, with broad petals showing a plush-like surface, with odd glistening sheen; the pure white blooms seen at most of the shows were extremely beautiful.

TWO MAGNIFICENT UNEQUALLED "MUMS"

Golden Wedding, the Grandest Yellow, and Silver Wedding, the Grandest White.
Price, 10 cents each, the two for 15 cents.

GOLDEN WEDDING—The grandest golden-yellow variety, and is the marvel of the period. Nothing can exceed the richness of its color. It is a remarkably vigorous grower, and has such strength of stem that it carries its great globular flowers erect, giving it a bold, majestic appearance. The form of the Golden Wedding is unique; the outer petals droop downward in picturesque irregularity, the center of the flower is built high, with broad petals irregularly overlaid, so that, although the flowers are large, they are not heavy, solid-looking, like many others. This grand variety has been awarded the highest honors wherever exhibited.

SILVER WEDDING—This variety is of mammoth size, of robust habit, with magnificent foliage; purest snow-white in color; very broad, heavy, deep flower, measuring fourteen inches in diameter. When the flower is several days old the outer petals curl and interlace. Probably the largest of all whites, and no doubt the very best. This charming variety has taken prizes wherever shown.

Equally valuable for exhibition or commercial purposes. Perfectly double. Every flower is perfect; mid-season variety.

MRS. HENRY ROBINSON

In the entire Chrysanthemum family there is no grander white variety, no matter when it blooms; it is of the most popular

style—immense incurving, broad-channeled petals of great substance and the purest white—can be used a few days earlier, but it is a sin to cut it until the center petals have begun to develop; from a flat incurved form it gradually changes into a perfect ball of snow; foliage as handsome as that of Mrs. Jerome Jones; a variety of the easiest arrangement. We do not think it possesses a single fault. Winner of twenty-six first prizes.

MRS. COOMBS

An extra fine very early pink variety of the largest size, blooming just after Glory of the Pacific and before Pink Ivory. Color, beautiful rose-pink, resembling Vivien Morel in color and also in style, but the petals are broader. It is a fine dwarf grower. First-class pink Chrysanthemums are scarce, and this variety will prove exceedingly valuable on account of its earliness and large size.

ALICE BYRON—This is a magnificent variety with every good quality. For size, finish and purity of color, it leaves little to be desired. Color purest white, with clear, smooth florets. In some stages it resembles Mrs. H. Weeks, but as the florets expand the whole fall back and form into a deep, solid bloom. This will be found an extraordinarily fine exhibition variety.

The Royal Plant, CAMELLIA JAPONICA

The royal family of greenhouse plants. Leaves glossy-green and flowers of the most exquisite beauty and waxy texture. From pure white to crimson in almost endless variegation. The pure white ones are generally prized above the colored varieties. Their culture is nearly related to that of the Azalea, but their success is more certain. Requires shade and moisture throughout the hot season. Their time of blooming is winter and early spring. Requires a moderate and uniform temperature with as little artificial heat as possible. When set with flower buds great care must be taken in watering—when left too dry the buds are sure to drop. We have a fine assortment. **Price, for very large, strong plants, by express, 75 cents each.**

N. B.—Our Camellias are imported from Holland, and while we exercise great care in sending them true to name, they sometimes become mixed through no fault of ours, and sometimes they will vary a light shade as to color. Consequently under these circumstances we cannot replace them on this account.

**ARAUCARA EXCELSA (Norfolk Island Pine)**

Various names have been selected for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give adequate idea of its beauty. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequalled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. **Price, nice plants, three and four tiers of leaves, \$1.00 each. Must be sent by express.**

CROTONS

The Crotons are among the finest decorative foliage plants known. Leaves are more or less veined and margined, sometimes entirely variegated with shades of yellow, orange and crimson. THE LARGEST AND FINEST EDIBLE LEMON IN THE WORLD

Price, for very strong young plants, 10 cents each, six for 50 cents; strong, handsome plants, from four-inch pots, 25 cents each; large two-year-plants, fruiting size, 50 cents each; very large, handsome plants, exceptionally fine, fruiting size, \$1.00 each.

A Photograph of a Four-Year-Old Lemon Tree

To Schmidt & Botley:

The above Lemon weighed two pounds and six ounces, and was raised on a bush bought from you four years ago. There were other Lemons at the International Fair at San Antonio, but this was the biggest and finest ever brought there. I send you clipping from the San Antonio Express of November 23. There were seven Lemons on the bush, four of which measured fifteen inches and over.

We have thousands of testimonials like these, and we guarantee the Lemon to be all we claim for it. No home is complete without one.

NOTICE—We would call the attention of our patrons to the fact that some are sending out our American Wonder Lemon under the fictitious name of "Ponderosa." When ordering this marvelous Lemon, send to us. We introduced it, we named it, and we have by far the largest stock in the world of this splendid Lemon.

THIS TRULY WONDERFUL LEMON

was introduced for the first time to the public by us in the spring of 1899. Since that time we have grown and sent out thousands to all parts of the country, and the reports we have received from our patrons in all quarters as to its productiveness and size is very flattering.

The American Wonder is a true ever-bearer, blooming and fruiting at the same time. Think of sixty Lemons setting from one branch of bloom on a small twig. It has bloomed and set fruit on the naked trunk of the tree. There is no Lemon in the world to compare with it.

Its Culture—Plant it in any good garden soil in a large pot or small tub, and keep it in the house or cellar during the winter. You can set the tub and plant out on the piazza or lawn when the weather gets warm. Give plenty of water while it is growing. No plant is easier to grow.

The American Wonder on its own roots—We guarantee the trees to produce the same large fruit. No budding or grafting. Every plant we send out is on its own roots, and will produce fruit as freely and as large as shown in the photograph on this page.

Clipping from San Antonio Express, Nov. 23, 1905:

MR. EADS GETS SAMPLE. Texas Lemon to be Seen at the Fair.

"The largest Lemon ever grown in Texas, so far as any record has been made of this sort of products, has been received by Homer Eads, assistant general freight agent of the International & Great Northern Railway, and will be placed in the agricultural exhibit at the San Antonio Fair. The Lemon was grown by A. Sion, at Kyle, and forwarded by M. A. Johnson, International & Great Northern agent there, to Mr. Eads. It is 18½ inches in circumference and is finely formed and handsomely colored. The exhibit will no doubt attract much attention."

Yours truly,

A. SION, Kyle, Texas.

Hardy Perennial Plants

SUITABLE FOR CEMETERY, LAWN AND GARDEN

Hardy perennials are those plants which die down in winter, but start again in the spring from the root, lasting many years and flowering every year. Never before have they been so popular, and from present indications of a desire for hardy plants, the demand for them will continue to increase, which will make them as popular in the United States as they have been in the horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting; then again others are fine for cutting to be used for table decorations.

Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure or bone meal, deeply dug, well pulverized, in which the plants should be set as early in the season as possible, so as to enable them to become well rooted and established before hot, dry weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot, dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

OUR FLOWER SEED DEPARTMENT

SEEDS THAT GROW AND BLOOM

We have used the greatest care in obtaining our flower seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown, rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Most flower seeds germinate well in a fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler, regularly. Many seeds are killed by drought.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes—in good garden soil. Cover the seed very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be used in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

ASTERS

The Aster is one of the most popular and satisfactory garden flowers now grown. The profusion of bloom makes it one of the best for bedding, and the lasting quality when cut makes it fine for house decoration. The newer varieties rival Chrysanthemums in color and form. The seed may be sown when trees are starting out in leaf out of doors or sown earlier in the house and transplanted.

CABBAGE

The ground must be highly manured, deeply dug or plowed and thoroughly worked to insure good, full-sized heads. A heavy, moist and fresh loam is the most suitable. Sow early in the spring in hotbed, or later in open ground. Plant out eighteen inches or two feet apart. Late varieties are usually sown by the middle of May, and the plants set out in July, in rows three feet apart, and two feet apart in the rows. One ounce will produce three thousand plants.

Selected Early Jersey Wakefield—The Early Wakefield is the standard early cabbage in all the Northern markets, a larger acreage of it being planted than of all the other early sorts combined. It is the hardest and hardest heading of the extra early sorts, and most Northern gardeners depend upon it for the bulk of their first crop. A fine, solid, pointed head. **Price, packet, 5 cents; ounce, 25 cents.**

Early Drumhead—The earliest of all large cabbage, being nearly as early and fully one-third larger than the Early Summer, and therefore much more profitable to the market gardener. They are remarkably solid and uniform in color as well as in shape and size. **Price, 10 cents per packet; 35 cents per ounce.**

Late Flat Dutch—(Late) This is the finest late variety on the market for fall and winter use; heads hard and solid, large and heavy. Very popular with Germans for kraut. **Price, 10 cents per packet; 30 cents per oz.**

The True Danish Ball-head Cabbage—It is highly esteemed for winter use by reason of the great solidity and excellent keeping qualities of the heads. It is an easy matter to grow this same cabbage in cool locations in our own country, and we offer seed of the finest selected strain, which has been grown especially for us in Denmark. **Price, 10 cents per packet; 35 cents per ounce.**

Late Flat Dutch

CARROTS

The Carrot, like other root crops, flourishes best in a well-enriched sandy soil, deeply tilled, and if plowed the fall before, all the better. Sow early in spring in drills fifteen to eighteen inches apart, finally thinning plants to three or four inches; keep clean by frequent hoeing and weeding; if neglected, the young plants are easily smothered, and the crop is lost.

Danvers Half Long Orange—Rich dark orange-colored roots. **Ounce, 8 cents; one-fourth pound, 20 cents; pound, 65 cents.**

Early Forcing—Best for early and late crops and frames. **Ounce, 10 cents; one-fourth pound, 30 cents; pound, \$1.00.**

SWEET CORN

Sweet Corn should not be planted until the ground is quite warm, as is it liable to rot if planted in cold, wet soil. It is a good plan to plant at intervals of two weeks until July; you will thereby have corn to use from July until October.

Silver Lace—A single kernel will produce three to four stalks, handsome ears, six inches long with sixteen rows of smooth, metallic-white grains. **Packet, 5 cents; pint, 25 cents; quart, 40 cents.**

CELERY

One ounce will sow a bed of Nine Square Yards and produce about 2,500 plants.

CUCUMBER

Cucumbers succeed best in warm, rich, loamy soil. As soon as the weather becomes warm and settled, plant in hills four to six feet apart each way, with ten to twelve seeds in a hill; cover one-half inch deep. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill.

Long Green Turkey—The largest long green variety grown. Splendid fruit, smooth and firm. **Price, 5 cents per packet; 15 cents per ounce.**

Early Cluster—This is not only a very early variety, but is also extremely prolific. If the fruits are kept gathered, vines will continue bearing throughout the season. The fruits, of medium size and rich, dark green color, average from four to five inches in length by an inch and a half in diameter. Owing to its great productiveness, it is an excellent variety to plant for producing small pickles. **Price packet, 5 cents; ounce, 20 cents; two ounces, 35 cents.**

Improved Early White Spine—A very fine, prolific early strain, producing great numbers of quite large, smooth fruits. While specially selected with a view of growing under glass during the winter and spring months, it is equally desirable as a garden or market variety planted in the open ground. **Price, packet, 5 cents; ounce, 20 cents; two ounces, 30 cents.**

PARSNIP

One ounce will sow two hundred feet of drill; five pounds for one acre. Sow as early in the spring as the weather will permit, in drills fifteen inches deep, covering half an inch deep.
